NOTE: All threaded ends of bolts protruding beyond nuts must be cut off and/or peened to eliminate sharp edges. No more than two threads should extend beyond face of nut. All washers, "T" nuts, and other fastener hardware used on round pipe or tubing must be hammered down to conform to the curved underlying surface to eliminate catch points. DO NOT tighten nuts more than hand-tight until entire assembly is completed.

- STEP #1: Lay top rail on the ground - nut side up.
- STEP #2: Insert right upper corner and left upper corner into ends of top rail. Attach with ½" x 2 ¾" Button Head Bolt, ½" washer. Even up the edges and tighten corners.
- STEP #3: Insert uprights onto corner brackets nut side up and attach with ½" x 2 ¾" Button Head Bolts and ½" washers.
- STEP #4: Sleeve the upper and lower supports together and attach with 5/16" x 1" Button Head Nut and 5/16" x 1 ¾" Button Head Bolt.
- STEP #5: Attach supports to soccer frame using 3/8" x 1 ½" Tap Bolts and 3/8" washers on top and bottom of each side of the goal.
- STEP #6: Drill 1/8" diameter holes in desired locations around the rear side of the frame for net clamps and self-tapping screws. Recommended installation is 1' on center apart.
- STEP #7: Attach the net to frame by threading net into ½" plastic clamps and attaching clamps to frame with #8 x 1" self tapping screws and ¼" nut driver provided
- STEP #8: Stand goal up, put into position, and anchor to the ground with 4 Anchors (563-901) driven down on the lower supports.
- STEP #9: Repeat steps 1 through 8 for second goal.

MAINTENANCE INSTRUCTIONS:

Check periodically for loose bolts, broken parts and replace immediately.
