### TOOLS NEEDED FOR THE JOB:

Post Hole Digger  
Level  
10 cu. ft. of Pre-Mix Concrete

Crescent Wrench  
5/16" Socket Wrench

### GENERAL ASSEMBLY INSTRUCTIONS

1. Check each piece carefully and remove any sharp projections that may have been caused by shipping.
2. DO NOT Tighten nuts more than hand-tight until the entire assembly is completed.
3. All threaded ends of bolts protruding beyond nuts should be cut off and peened over to remove any sharp edges.

### SPECIFIC ASSEMBLY INSTRUCTIONS:

1. Mark and dig footing holes as shown below.
2. Assemble one center section of backstop on ground with bottom of upright posts at the front edge of the footing holes.
3. Hand-tighten all bolts securely.
4. Raise assembly into position in footing holes.
5. Assemble each additional section in a similar manner. Raise and attach to sections already in place.
6. **(for 551-511 model only)** Add hood sections.
7. Plumb and level backstop. Tighten all bolts securely.
8. Pour footings. Place bricks or old cement chunks below the posts to allow wet cement under the post.
9. Allow 48 hours for concrete to dry before using the equipment.

### MAINTENANCE:

Check periodically for loose bolts and broken parts. Tighten and/or replace immediately.
